Summary

MERN Stack Developer with **3.5+ years** building production-grade **SaaS and enterprise platforms**. Delivered **6+ production applications**, including **end-to-end ownership** of **multiple full-stack systems**. Led and mentored a team of **5 developers** at **Krishang Technolab**. Experienced in building scalable web applications, reusable architectures, and high-performance REST APIs using React.js, Next.js, TypeScript, and Node.js.

Skills

Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI (MUI), SSR, React Native

Backend: Node.js, Express.js, Authentication (JWT/OAuth), RESTful APIs, MongoDB, Firebase, Component Architecture

Cloud & DevOps: Docker, AWS, CI/CD, Microservices

Tools: Git, GitHub, Postman, Swagger, Jira (Agile/Scrum), Unit Testing, Jest, Vercel, Cursor AI, GitHub Copilot

Experience

Krishang Technolab

December 2022 – Present

Full Stack Developer

Ahmedabad, Gujarat

- Developed full-stack compliance modules using **React.js, TypeScript, and Node.js**, integrating multiple third-party verification APIs to support secure identity validation and regulatory workflows.
- **Led a cross-functional project and mentored 5 junior developers**, establishing clean code practices and improving delivery quality across multiple releases.
- Architected a **schema-driven dynamic form system supporting 100+ configurable forms** in React, enabling rapid feature expansion while maintaining consistency and reducing development effort.
- Streamlined Git-based collaboration and peer code review practices in a Scrum environment using **Jira**, improving release quality and development consistency.

Key client projects delivered at Krishang Technolab:

Philantro AI | MERN Stack, SSR, Tailwind CSS, Visily, Trae

October 2025 – Present

- Developed modular NGO management features including a **custom form builder, dynamic report generator, customizable chart generator, and milestone tracking**, enabling configurable project monitoring and reporting.
- Built AI-assisted UI/UX prototypes using **Visily** and collaborated with product managers and designers to convert them into **Figma designs** and production-ready components.

Rostered AI | Next.js, Material UI, GitHub Copilot

February 2025 – July 2025

- Refactored and restructured a large codebase, **reducing bugs by 60%** and **accelerating feature delivery by 40%**.
- Developed **leave and unavailability management modules** using **Next.js and Material UI**, enabling efficient staff availability tracking and workforce planning.

Verify 360 | React Native, MERN Stack, AWS Rekognition

March 2023 – November 2024

- Designed and developed a full-scale **KYC compliance platform** supporting **100+ client verifications**, enabling document uploads, **3D liveness detection**, real-time geolocation tracking, and third-party API integrations.
- Implemented a **risk-scoring algorithm** combining user data, document validation, and liveness detection results to automatically identify suspicious users.

Krishang Technolab

August 2022 – December 2022

Web Developer Intern

Ahmedabad, Gujarat

- Built an internal HR management tool for attendance and leave tracking, **used by 30+ employees**.

Education

B.E. in Computer Engineering

Graduated: 2022

(SCET), Kalol

CGPA: 8.76 / 10
